COST CHANGE FOR 2021	3%	3%	2%

* SEE EXCEPTION SHEET

Bender Communications

EXCEPTIONS

1. All removal & install prices bid assume a quantity one piece of equipment being removed and/or installed per trip. If multiple pieces of equipment are removed and/or installed per trip and can be accomplished by one person during a normal work day, then prices for the additional work will be adjusted accordingly. Example: remove 2 bases on same trip – base 1 removal \$220, base 2 removal \$60.
2. Base removal consists of disconnecting base from all cabling only – does not include any outside antenna removal or line removal.
3. Remote removal consists of disconnecting wiring from remote – no wireline removal.
4. Mobile removal assumes 1 standard under dash mount radio removal, antenna and antenna line removal (if possible), antenna hole plugged, and power line and fuse removal (if possible) to be reused on next install assuming items are in good shape.
5. Install base assumes using existing antenna and line, existing remote line and 110vac outlet within 3 feet of base equipment as well as adjusting levels.
6. Install remote assume using existing wireline cables, adjusting levels and 110vac outlet within 3 feet or remote.
7. Mobile installation pricing assumes one standard under dash mount radio, thru roof mount antenna and power cord; parts are extra charge.
8. Non-technical and technical labor are charged from the time Bender personnel leave the Marion office until they return plus a \$40 vehicle charge.
9. Pending quantity of removals and/or installs will determine quantity of Bender personnel sent and pricing will be adjusted accordingly.
10. If multiple trips are necessary for removals and/or installs, prices will be adjusted as a per day occurrence.
11. Base loaner equipment if base will be out over 24 hours – if base equipment is used on the Ohio MARCS system, it is not possible for Bender Communications to provide an immediate loaner due to the State of Ohio's process for assigning ID's. A possible solution for this would be for the City of Lima to purchase one or two control stations on the MARCS system and have all departments information programmed into each.
12. Severity Calls – Bender Communications has existing maintenance contracts with customers that pay a monthly fee for us to have personnel on call 24/7. Because the City of Lima is asking for a "services rendered" type of contract, availability of a technician on a severity call for the City of Lima will depend on the "call out" of a technician for those existing Bender contracts. All severity 1 & 2 calls will be billed accordingly to availability of Bender Technicians.
 - a. Severity 1 – doubletime at a minimum of 4 hours plus \$40 vehicle charge.
 - b. Severity 2 – possible same charges as above, but a possibility of time & a half. Minimum of 4 hours plus a \$40 vehicle charge.
13. Normal business hours for Bender Communications are Monday – Friday, 8 am – 5 pm with 1 hour lunch, excluding holidays.
14. Standard overtime rates apply for non-severity calls.
